Contents

1 Introduction

1.1 Purpose

The purpose of VideoNexus is to provide users a video-sharing entertainment platform where they can watch videos of different categories.

1.2 Project Scope

1. Objectives: To provide a user friendly interface so that the user enjoys spending time on the site.

2. Constraints: As we have limited knowledge, experience and skill set, our site may not be top-notch.

3. Assumptions: We have assumed that user has already created and logged in an account on this site

2 Overall Description

2.1 Product Features

• The home page shows 12 videos

- When you click on any video, a new video player webpage opens in same site, with same header

- Video player plays the video and shows basic options like play/pause video, go full screen, show settings

• Website logo appers on top left

- Clicking on website logo redirects to homepage

• Search bar appears on top

• A menu option bar appears just below the search bar

• Option bar contains different options

- It contains a home button which redirects to homepage

- It contains 4 category buttons

o gaming o music o news o sports

- By clicking on any category, it jumps to the respective category videos

• A profile logo appears on top right

- By clicking on that logo, user profile opens in a new webpage in the same site

2.2 Hardware Requirements

This website is designed to run on desktops only. Mobile displays may not show the correct format.
